Objective:

Passionate and skilled Software Engineer/Web Front-End Developer with expertise in React and cutting-edge web technologies, seeking a position to showcase talents in crafting immersive user experiences, driving business growth, and delivering innovative web solutions. Ready to collaborate with a dynamic team to create impactful digital experiences.

Academic Qualification:

Hong Kong Baptist University
MSC Data Analytics & AI (DAAI)

Kowloon, Hong Kong
2022-2023

Bahria University Islamabad Campus
BS Information Technology (BSIT)
Gold Medalist

Islamabad Pakistan
2017-2021

Work Experience:

Front End Developer
Oxbridge economics· June 2022– September 2023
<https://www.oxbridge-econ.com/>
Hong Kong SAR

Job Duties:

Developing and implementing web applications using React.js for the FinFast project, a powerful financial search engine.

Taking ownership of the entire project lifecycle, from initial development to final deployment.

Collaborating with designers to translate wireframes and mock-ups into responsive and user-friendly interfaces.

Writing clean, maintainable, and efficient code while adhering to best practices and coding standards.

Debugging and resolving issues, including fixing bugs and addressing performance bottlenecks.

Collaborating with the backend team to integrate front-end components with the server-side infrastructure.

Participating in code reviews to ensure code quality and provide constructive feedback to team members.

Communicating effectively with project stakeholders, including managers and high-level executives, to understand requirements and deliver solutions that meet business objectives.

Staying updated with the latest web development trends and technologies, and proactively suggesting improvements to enhance the application's functionality and user experience.

Demonstrating a proactive and problem-solving attitude, taking initiative to identify and address potential issues or challenges.
